PREFACE

The 1986 edition of *State-Approved Schools of Nursing—RN* reports the results of NLN's annual survey of schools of nursing, covering the period between August 1, 1984, and December 31, 1985. The publication provides a comprehensive directory of all 1,473 RN programs in the U.S., with alphabetical state listings. As in past years, NLN has maintained a response rate of 100%. Lists of schools of nursing in the U.S. are maintained by NLN and are updated each year by questionnaires sent to each state board of nursing. Newly opened programs and those that have recently closed are listed at the end of the directory. The first section of the directory lists all state-approved nursing programs preparing students for RN licensure. For each school, the following information is included: address, telephone number, director, accreditation status, state board approval, financial support, administrative control—as well as admissions, enrollments, and graduations. Unless otherwise indicated, all schools listed in the first section must be state-approved.

Footnotes are included to help the reader understand some of the new options available to the contemporary nursing student as well as to clarify unusual features of some programs. A description of the footnotes appears on page xiii and it is suggested that you read them carefully.

The second section of this year's edition includes only those 166 programs designated exclusively for RNs completing their baccalaureate degrees. Addresses, telephone numbers, directors, NLN accreditation status,enrollments, and graduations are also included for each school. Those baccalaureate programs that mainstream RNs into their regular degree program are included in the first section and are accompanied with footnote #9.

Programs that admit RNs only (popularly known as BRN programs) usually are not mandated by law to be state-approved, since these programs are restricted to students who have already been licensed by the state. Thus, programs need not be approved by state boards of nursing in order to be listed in the second section. Lacking mandatory state board approval, there has been no central source for identifying all such programs. Hence, section two listings are thorough, but not necessarily exhaustive.

A few schools have requested that the statistical information provided in the annual survey not be listed in the directory. This request has been honored in the school listings.

This is one of several publications under the revised format for NLN's research publications. Other modules include: *Nursing Student Census with Policy Implications, Nursing Faculty: Socio-economic Trends,* and *State-Approved Schools of Nursing—LPN/LVN 1985.* An annual publication at the end of the year, entitled *Nursing Data Review* will be based on the modules and will include additional information. We hope users will find this format helpful in facilitating access to our research findings.
